

# Save **NATURE** and your business as well

Advance Bio Material Co. Pvt. Ltd. is an innovative company dedicated to developing high-performance Bioplastics in India. Our passion is in delivering functional bio-polymers and its products to our customers who perform in their own markets and meet product performance criteria at a reasonable cost and deliver great bio-credentials. We are committed to provide all necessary support to our customers, starting from selecting the right product, trials and testing, its conversion, performance on further packaging, usage, technical, legal and composting requirements.

## **BIOPLASTICS RAW MATERIAL**

Our Bioplastics raw materials are derived from natural, renewable resources and are optimized for its performance. They are 100% biodegradable and compostable within 180 days and can be fully decomposed into carbon dioxide, water and minerals, which in turn are good for crop causing no harm and toxicity to the farmland and conform to International Standards – EN13432 and ISO17088:2012.
